VETERINARY ASSOCIATES

LIFETIME CARE PLAN

Personalized developmental exams every 3-4 weeks until 16 weeks of age or fully vaccinated. Lifestyle-tailored vaccines and parasite prevention programs.

Initial health assessment. Identify individual developmental and lifetime health concerns. Parasite screening and treatment.

Spay/neuter surgery - we help you decide the best age specifically for your dog or cat.

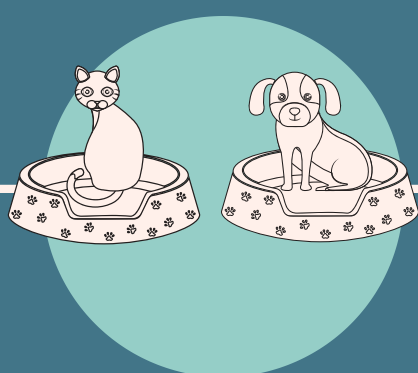

Age 1-7 adult annual preventive care exams, lifestyle appropriate vaccines, yearly lab screening for health problems, parasites and infectious disease.

Starting at age 7 senior bi-annual preventive care exams, lifestyle appropriate vaccines, yearly lab screening for health problems, parasites and infectious disease.

Professional dental cleanings and customized management of any health problems identified during annual exam. Additional visits are scheduled as needed.

Customized management of diseases and aging. Emphasis on comfort and quality of life. Helping you through every difficult decision.
